E. C. Rodriguez-Merchan Nicholas Goddard Christine A, MA MD Lee - Musculoskeletal Aspects of Haemophilia. (2000)

Musculoskeletal evaluation in severe haemophilia A ...  
The objective of this study was to evaluate the musculoskeletal status of haemophilia patients from 10 countries in Latin America, and to examine the relationship between musculoskeletal status and treatment practices in each country. We sought to determine if early institution of long-term prophylaxis resulted in better musculoskeletal outcomes.

Treatment of musculo-skeletal pain in haemophilia ...

E.C. Rodriguez-Merchan, H. de la Corte-Rodriguez, V. Jimenez-Yuste Efficacy of celecoxib in the treatment of joint pain caused by advanced haemophilic arthropathy in adult patients with haemophilia A

Musculoskeletal evaluation in severe haemophilia A ...

There is a paucity of literature on haemophilia treatment in Latin American countries, a region characterized by rapidly improving systems of care, but with substantial disparities in treatment between countries. The aim of this study was to evaluate the musculoskeletal status of haemophilia

Musculoskeletal complications of hemophilia.

Musculoskeletal complications of hemophilia. Rodriguez-Merchan EC. The most important clinical strategy for management of patients with hemophilia is the avoidance of recurrent hemarthroses by means of continuous, intravenous hematological prophylaxis. When only intravenous on-demand hematological treatment is available, frequent evaluations are necessary for the early diagnosis and treatment of episodes of intra-articular bleeding. The natural history of the disease in patients with poorly

Musculo-skeletal manifestations of haemophilia

A knowledge of the musculoskeletal signs and symptoms of haemophilia is essential for providing a treatment which is suitable and customized. Physical medicine and rehabilitation techniques, which

The current role of orthoses in treating haemophilic ...

Haemophilic arthropathy (HA) is an inevitable consequence of repeated haemarthroses in people with haemophilia, and principally affects their ankles, knees and elbows.

MUSCULOSKELETAL ASSESSMENT FOR PEOPLE WITH HAEMOPHILIA

It includes the development of musculoskeletal assessment guidelines, based on data in the literature and recommended by the World Federation of Haemophilia (WFH), for clinical, physical, functional and diagnostic imaging evaluation.
