The Different Forms of Flowers on Plants of the Same Species

The Different Forms of Flowers on Plants of the Same Species is a book by Charles Darwin first published in 1877. It is the fifth of his six books devoted solely to the study of plants (excluding The Variation of Animals and Plants under Domestication).

The Different Forms of Flowers on Plants of the Same Species

His next book, The Different Forms of Flowers on Plants of the Same Species (1877), was again the result of long-standing work into the way evolution in some species favoured different male and female forms of flowers to facilitate outbreeding. Darwin had long been sensitive to the effects

The different forms of flowers on plants of the same Species

Distyly is a floral polymorphism characterized by the presence of two discrete morphs with reciprocal positioning of anthers and stigmas in flowers on different plants in the same population.
